Hack 4 Inclusion 2.0

Team Name: Code Linguists

Date of Event: 15-17 May,2022

Hack 4 Inclusion was a hackathon conducted on 15-17, May, 2022 by IIIT Allahabad exclusively for women. There was more than 200+ participants with around 50+ teams. Our team has secured 2nd place with a cash prize of Rs. 25,000 & Bluetooth speakers. We have developed an app called First Talk which bridges the communication gap between Challenged (Deaf/Mute) people with normal people. We have used Machine Learning (ML) & Android Studio this project. The overall accuracy of the detection model is 96%.

First Talk

First Talk an App which bridges the communication gap between Challenged (Deaf/Mute) people with normal people. It allows challenged people to have regular conversations with common people on day-to-day basis, using our live detection system.

Using the live detection technology, these challenged people can talk with the common people. When these challenged people perform their sign language, the app recognizes their sign language and outputs them in text format. This app also has a learning section where common users can take up courses to learn sign language.

Features

- Our app mainly uses a detection technology, through which the challenged people act their sign language & the app outputs the text they are trying to communicate.
- Apart from detection technology and its uses, the app also contains a learning section where anyone can take up free courses to learn the sign language from scratch.
- Sign Language Detection can be performed in American Sign Language (ASL), Indian Sign Language (ISL). In ISL, we have incorporated Hindi & Gujarati Language.
